Eyestorm is a fun little game well worth the 3.99 USD I paid. You'll fly three types of helicopters around an archipelago, moving people and cargo to their destinations. The only problem I encountered with Eyestorm is the default keybinds don't match the tutorial:

F repairs damage when landed at helipads (not Y as the tutorial claims).
ENTER lowers\/raises the cable (not control).

To exit the game, press P for the pause menu.
